Tools and methods for food engineering

NMR and MRI applications

964 Effect of heat treatment on water permeability of yeast cell as measured by Pulsed field gradient NMR. Lee C.H., Hong Y.S., Suh K.J., Yoon S.W., Volkov V.I.

920 1H NMR diffusometry study of water in whey protein gels and solutions. Mariette F., Colsenet R., Le Garff C., Cambert M.

765 Measurement of temperature and other heat induced changes by Magnetic Resonance Imaging (MRI). Nott K.P., Hall L.D.

815 Correlation of microbial response in model food systems with physico-chemical and mobility (NMR molecular and structural) descriptors of the media. - Vittadini E., Lavoie J.P., Pham X., Chinachoti P.
Tools and methods for food engineering

Measurements and properties

962 General isotherm to predict protein matrix-NaCl-Water relationships in fish products. Chenoll C., Argüelles A., Sanz J., Fito P.

743 The thermal, physical and mechanical properties of complex particle charged foodstuffs. Legrand A., Santer J., Fillaudeau L., Bournaud S., Berthou M., Leuliet J.C.

873 Sorption isotherms of “Pyrus communis cv. Conference” pear tissue and cuticle in the high relative humidity range. Nguyen T.A., Verboven P., Daudin J.D., Nicolaï B.M.

800 The use of stochastic curve-fitting for the rapid determination of thermal conductivity. Pham Q.T., Yip C.K.

732 Thermal analyses and combined techniques in food physical chemistry. Schiraldi A.
Tools and methods for food engineering

Engineering

589  Apparent moisture and salt diffusivities in gelatin gels: effect of gel composition and applied process. Boudhrioua N., Bonazzi C., Daudin J.D.

286  Energy conservation in the food industry using process integration methodologies and case study. Fritzon A., Berntsson T., Vamling L.

363  Quality in food processing design: an user oriented approach including a new creativity method. Giroux F., Totobesola-Barbier M., Marouzé C.

833  Use of a coloured tracer to follow the thermal treatment in a scraped surface heat exchanger. Mabit J., Fayolle F., Legrand J.

942  The wastes of the food industry – Specified according to accumulation masses, substances of content and ways of reuse. Russ W.
Tools and methods for food engineering

**Education in food process engineering**

460 A low-cost, shared laboratory experiment in food engineering to teach process control. Courtois F., Sawka R., Moussa S.

622 ISEKI-Food - Integrating safety and environmental knowledge into food studies towards european sustainable development – a Socrates TN. - Silva C.L.M., Morim A.S., Fernandes H.M., Noronha M.R.
**Tools and methods for food engineering**

**Engineering of fat, oils and lipids**

596 Study of chicken fat dry fractionation. Arnaud E., Pina M., Collignan A.

727 Temperature dependence of lipid oxidation rate as affected by the physical state. Calligaris S., Manzocco L., Nicoli M.C.

796 Determination of the effect of palm-shell discolouring process on its mechanical resistance. Casas Forero N., González Vargas A.L., Zumaeta N.

126 An investigation into mechanical factors that cause milk fat globule membrane damage during processing. Downey M.C., Trinh K.T., McCarthy O.J., Fee C., Prankerd C.

714 Comparative study of water content two non-conventional oil seeds (Canarium schweinfurthii and Butyrospermum parkii) on physicochemical properties of oils extracted. - Kapseu C., Tchankou Leudeu B.C., Tchiegang C., Fomethe A., Parmentier M.

799 Fat bloom in chocolate: Introduction and mechanism. Highlight of bloom mechanism due to unstable crystallization. Lonchampt P., Hartel R.W.

577 Microstructural, thermal and crystallization characteristics of olive oil - monoglyceride mixtures. Ojijo N.K.O., Kesselman E., Shuster V., Eichler S., Neeman I., Eger S., Shimoni E.
Impact of operations on nutritional properties of food

115 Physicochemical and rheological characterization of a yogurt with added calcium and low level of fat. Aguirre-Contreras S., Sosa-Morales M.E., Vélez-Ruiz J.F.

450 Effect of fortification of yogurt with fiber and calcium on the rheological and physicochemical behavior. Aportela-Palacios A., Sosa-Morales M.E., Vélez-Ruiz J.F.

513 Hygroscopicity and ascorbic acid degradation of lemon juice co-crystallized with sucrose. Astolfi-Filho Z., Salles A.C., Telis V.R.N.

371 Purple wheat - Functional properties and processing aspects. Berghofer E., Kreilmayer I., Roggenhofer M., Mar A.

11 Comparison of some properties of the different types of pestil. A traditional product. Cagindi O., Otlés S.

237 Optimization of blends of flours to produce foods for children with under nourishment - acute diarrhea. Daly M., Diaz B., Daly K.

646 New formulas of a meat product for celiac patients. Delgado M., Mendez O.

91 Strategies for reducing the cost of nutrient supplement addition to fermentations for producing lactic acid from whey permeate. - Fitzpatrick J.J., Murphy C., Scully K., Pauli T.

351 Deacidification of palm oil by liquid-liquid extraction - Effect on tocopherols. Gonçalves C.B., Filho P.A.P., Meirelles A.J.A.

907 Vitamin fortified rice grain. Kyritsi A., Tzia C., Karathanos V.T.

728 Effect of temperature and water activity on carotenoid oxidation rate. Manzocco L., Calligaris S., Nicoli M.C.
Impact of operations on nutritional properties of food

451 Effect of calcium on functionality of Mozzarella cheese made from skim milk. Muthukumarappan K., Nitinkumar J., Rajiv D.

884 Recovery of some components lost during osmotic dehydration of pineapple. Peiró R., Ayala S., Camacho M.M., Martínez-Navarrete N.

783 Impact of fatty acid formulation on the margarine pastry properties. Sfayhi D., Bornaz S.

613 Functional fruits obtained by vacuum impregnation process. Tapia M.S., García R., Schulz E., Bermúdez-Aguirre D., López-Malo A., Palou E., Welti-Chanes J.

207 Hydroxymethylfurfural (HMF) concentration in polyfloral honey as affected by temperature. Visquert M., Escriche I., Andrés A., Fito P.

573 Enzymatic and microbial digestion of A and B type III resistant starch crystal polymorphs. Wolf H., Shimoni E.
Impact of operations on nutritional properties of food (1)

488 A procedure to develop mineral enriched fruits. Analysis of calcium and iron content by EDX-Ray microanalysis. Betoret N., Martínez-Monzó J., Fito P.

206 Effect of different cooking techniques on the quality of pork ham. Cheng Q., Sun D.W.

68 Formulation of phytosterols in emulsions for increased dose response in functional food. Engel R., Schubert H.

226 Calcium content and bioavailability in apple tissue through impregnation process. González-Fesler M., Salvatori D., Weisstaub A., Portela M.L., Alzamora S.M.
Impact of operations on nutritional properties of food (2)

467  Stability of emulsions containing lycopene and their application in food systems. Ribeiro H.S., Schubert H.

572  Tailoring resistant starch polymorphs for optimized prebiotic effect. Shimoni E.

826  Influence of coffee processing on ochratoxin A presence in green, roasting and brew coffee. Suárez Quiroz M., González-Rios O., Barel M., Guyot B., Schorr-Galindo S., Guiraud J.P.
Tools and methods for food engineering

Reaction engineering, kinetics and methods

887  Kinetic analysis of autoxidative docosahexaenoate triglyceride in the presence of rosemary extract with oxygen sensor. Furuta T., Georges C., Mizoguchi S., Soottitantawat A., Yoshii H., Linko P.

449  Uncertainty in thermal process calculations due to variability in non-first order kinetic parameters. Geedipalli S., Datta A.K.

421  Caramel's precursors nature influence in sugar industry. Hernández Verde A., Mersad A., Decloux M.

231  Growth modelling of P. digitatum under variable stress conditions. Jreige M.E., Elguezabal L.

119  Modelling of degradation kinetics of some quality characteristics in dried onions during storage. Kaymak-Ertekin F., Gedik A.

82   Oxidation processes of oleic acid esters of ethylene glycol and glycerol. Minemoto Y., Adachi S., Kometani T.

314  Growth and metabolic characteristics of immobilized salt-tolerant yeast. Mori A.S., Tanaka T.

737  Photocatalytic destruction of phenols of olive mill wastewaters. Provost E., Ayari B.
Tools and methods for food engineering

Reaction engineering, kinetics and methods (1)

519  Residence time distribution, heat transfer coefficients, velocity and temperature profiles of banana puree in a tubular heat exchanger. - Ditchfield C., Tadini C.C., Singh R.K., Toledo R.T

444  Solubility and crystallization kinetics of calcium lactate in aqueous systems. Liang B., Kubantseva N., Hartel R.W.

975  Use of an enzymatic kinetic based model for predicting shelf-life of map apple slices. Rocculi P., Del Nobile M.A., Romani S., Dalla rosa M.
Tools and methods for food engineering

Reaction engineering, kinetics and methods (2)

889  A kinetic model describing heterogeneous phenomena in foods or food processing. Adachi S., Matsuno R.

265  Kinetic modelling of polyphenol oxidase from banana macho (Musa paradisiaca). Cantú-Lozano D., Martínez-Rojas K., Hernández-Télésforo L.C., Cruz-Rivera B.

257  Correlation of non-linear model parameters and pH on pectinesterase thermal inactivation in minimally pasteurized orange juice. - Tadini C.C., Tribess T.B., Silva Jr P.A.

888  Acid-hydrolysis kinetics of pectin with soy protein to obtain emulsifier. Yoshii H., Furuta T., Linko P., Takahashi T., Maeda H.

Tools and methods for food engineering

Technology

625 Energy consumptions in different mini dairy plants. Carrara M., Comparetti A., Finoli C., Orlando S.

73 Virtual food and its role in cognitive sensory judgment in relation to food intake process and preference of consumer. Chun J.K., Shin S.W.

103 Technical equipment of the third millennium. Filatov V.V., Elkin N.V., Andreeva A.A.

384 Influence of blending on the composition of malvasia istriana wine. Kovacevic Ganic K., Banovic M., Komes D., Gajdos Kljusuric J.

553 Biological evaluation of mechanically deboning chicken meat protein quality. Mizubuti I.Y., Negrão C.C., Morita M.C., Colli C., Idia E.I., Shimokomaki M.

289 Characterization of lactose adsorption by organophylic clay by thermal analysis. Morais L.C., Dweck J., Büchler P.M.

187 Microbial profile of water and ice employed in the frozen fisheries factories. Navarro P., Elguezabal L., Daly M., J reige M.E., Moya E.

705 Physiological responses of Honey Dew Melons to 1-Methylcyclopropene treatments. Nicolais V., Maturi T., Langella A., Barbieri G., Masi P., Serek M.

337 Food production under diversification frame. Pérez O., Rodríguez P., Lombardi G., Pérez de Alejo H., Hernández A.

690 Wine-making wastes: cellulose and hemicelluloses recovery by mild methods. Spigno G., Pizzorno T., De Faveri D.M.

662 Minerals in milk- matching the physical properties to the technological requirements. Tsioulpas A.K., Lewis M.J., Grandison A.S.
Fermentation

559 Solid state production of single cell protein by Rhizopus microsporus var. oligosporus using apple processing waste. Albuquerque P.M., Koch F., Trossini T.G., Esposito E., Ninow J.L.

834 Fermentation as a tool for technological improvement of cereal raw materials. Douge M., Teissier P., Nonus M., Barbeau J.Y.

843 Internal transport of moisture and acetic acid content of cocoa beans during the fermentation process. García-Alamilla P., García-Alvarado M.A., Barel M., Berthomieu G.

792 Accelerated fermentation using vacuum infusion of liquid brewery residues in potato cubes. Sotelo I., Cáez G., Klotz B., Cueto C., Ramírez F., González-Mariño G.

246 An alternative process for the production of an additive for the food industry: Chitosan. Streit F., Koch F., Trossini T.G., Laranjeira M.C.M, Ninow J.L.

955 Astaxanthin production in green alga Haematococcus pluvialis. Yazdani M., Farahi Ashtiani S., Rahmati Ishka M.
Tools and methods for food engineering

Engineering, measurements and properties

202 Sorption isotherms of cassava (Manihot esculenta Crantz) slices. Andrés A., Betoret N., Alexandre B.B., Martínez L., Fito P.

866 Study of calcium diffusivity through apple tissue. Barrera C., Betoret N., Fito P.

738 Sorption isotherms and isohaline isotherms of sardine (Sardinella Aurita). Bellagha S., Sahli A., Glenza A., Kechaou N.

750 Vapor-solid equilibrium of ethanol-water mixtures in food-related solids. Carrin M.E., Ratti C., Crapiste G.H.

963 General Isotherm to predict protein matrix-NaCl-Water relationships in cheese. Chenoll C., Argüelles A., Sanz J., Fito P.

65 Determination of surface tension properties of wheat endosperms, flours and glutens. Cuq B., Blancher G., Morel M.H., Gastaldi E.

921 Food compatibility of artificial and plastics casings. Fava P., Puglisi M.L., lotti M.

133 Influence of fluid concentration on the elevation of boiling point of passion fruit juice. Gabas A.L., Telis V.R.N., Bernardi M., Telis-Romero J.

982 Chemical analysis of some Cameroon traditionally process complementary foods. Kana-Sop M.M., Teugwa M.C., Amvam-Zollo P.H.

244 Phenolic compounds and aroma profile in fresh fruit and low sugar jam of red currant. Levaj B., Dragovic-Uzelac V., Bursac D., Delonga K., Komes D., Kovacevic Ganic K.
Tools and methods for food engineering

Engineering, measurements and properties

879  Moisture adsorption isotherms of oatmeal biscuits.  McKee D.J., McMinn W.A.M., Magee T.R.A.

234  Food flavour evaluation through brain signals using digital signal processing.  Pereira L.R., Costa E., Souto S

932  Distance learning: measuring shape change and thermal expansivity in chocolate.  Pinschower K., Frer P.J., Handy B.S., Polgreen M.A., Wells M.A.

335  Role of wettability in wheat gluten plasticization mechanisms.  Pommet M., Morel M.H., Redl A., Guilbert S.

979  Evaluation of the conditions of cultivation in the profile of fatty acids of cianobacteria Aphanothece microscopica Nägeli.  Queiroz M.I., Zepka L.Q., Jacob-Lopes E.

682  Physical properties of starch based films.  Rodríguez M., Oses J., Maté J.I.

966  Thermogravimetric analysis on corn arabinoyxylans with different sugar compositions.  Yang J.C., Chang Y.H.
